

## **REMARKS**

In response to the communication from the Examiner dated 7/11/2005, claims 1-5 were rejected; Applicant respectfully traverses and files this Amendment. Applicant respectfully requests the Examiner's reconsideration of the rejection of the claims based on the following:

- 1) Applicant submits a change from "comprising" to "consisting of" in claim 1 to narrow its scope.
- 2) Applicant amends claim 1 to encompass only one vertical element, as all the prior art discloses and teaches "a pair."
- 3) Applicant amends the claims to require the present invention to be permanently attached to the truck frame such that it may be operational while the truck is moving, unlike Law and Dudley, which are mounted on the truck tire.
- 4) Applicant amends the claims to require the present invention to be used solely to access the truck windshield(s), windshield wipers and top running lights. None of the prior art teaches, suggests or motivates this precise use of the present invention.
- 5) Applicant submits a rough drawing to show the single vertical element (support) of the present invention. Formal drawings will be submitted upon notice of allowance.

**IN THE DRAWINGS:**

Applicant submits a new drawing to show one vertical or nearly vertical member.
